

It's Autumn, and we're cozying

with hot delicious cocoa, tea or steaming hot
coffee without burning our fingers

Our range of reusable plastic mugs are not only beautiful to look at, they are also both reusable and practical. The plastic cups are made of hard plastic, which makes them extremely durable. At the same time, the high insulating ability ensures that you don't burn your fingers, even if the contents of the

cup are smoking hot. They can be stacked , they can be reused, and washed more than 2000 times.

Many stylish designs, colours, with or without handle, maybe with your logo? Contact [us](#) to find out more about our products and what we can do so that your company can get beautiful, environmentally friendly cups, glasses and mugs.

We don't just think about the enviroment, we do something

When your glassFORever products have become worse for wear after years of use, they should not be thrown in the bin. Instead, we collect them and transport them to our Danish factory, where they are ground down and made into new eco-friendly products. [This is our recycling system – read more here](#)
